

Implant Complete Elite Implantology Mentorship

a Bioconcept-sponsored educational program

Next cohort commencing May 30-31, 2026

Each group limited to 6 Dentists

100 CE Credits | \$12,000 Tuition

Fall dates coming soon

Implant Complete is a premium, 11-day program spanning 8 months, offering personalized mentorship for general dentists using the Bioconcept system who are eager to excel in implantology. Rooted in long-term patient care—not implant tourism—this program delivers comprehensive guidance from diagnosis to final restoration on your own patients, with expert clinical mentorship throughout.

Our Program Offers

- **Comprehensive Clinical Training:** Structured instruction spanning diagnosis through final restoration, including case selection, site development, surgical placement, prosthetic workflows, and complication management.
- **Supervised, Real-Patient Experience:** Perform implant procedures on your own patients within your practice, supported by direct clinical mentorship.
- **Structured Mentorship:** Receive individualized guidance throughout the 8-month program, ensuring continuity from treatment planning to restorative completion.
- **Continuity of Care Model:** All treatment is delivered within your own practice environment, reinforcing long-term accountability and predictable patient outcomes. Advanced procedures such as grafting or sinus elevation are performed by faculty when indicated.
- **Practice Integration:** Develop the systems and clinical workflows necessary to integrate implant therapy sustainably into your practice.

Program Leadership

Implant Complete is headed by Dr. Bill Liang, who maintains direct oversight of curriculum design, surgical protocols, and clinical mentorship throughout the program. He is supported by a faculty team of carefully selected clinicians aligned with the Bioconcept system and committed to delivering consistent, high-level training.

Dr. Bill Liang

Director of Education &
Clinical Development

*"The magic is in the
magician, not in the wand"*

40+ years in implant dentistry

Diplomate, ABOI - Diplomate, ICOI - Fellow, AAID

Trusted for over 20 years in training general
dentists in implant Dentistry

Program Highlights

- Duration: 11 in-person clinical days over 8 months, complemented by self-paced learning and virtual case consultations.
- Locations: Vancouver, Surrey, Abbotsford B.C.
- Format: Didactic instruction, live surgical procedures, prosthetic workflows, and restorative workshops.
- Cohort Size: Limited to 6 dentists to ensure focused, individualized mentorship.
- Place: Place up to 10 implants across 2-4 of your own patients during the program.
- Materials Included: All surgical kits and restorative components required to complete treatment are provided.
- Clinical Team Integration: Participants may bring their dental assistant for designated clinical sessions.
- CE Credits: 100 CE credits awarded upon completion.
- Eligibility: Exclusive to clinicians using the Bioconcept system.

Who This Program Is For

- General dentists ready to expand into surgical and restorative implant workflows
- Clinicians seeking guided, real-patient experience within their own practice environment
- Dentists committed to building a sustainable implant program grounded in predictable outcomes

Take the Next Step

Participation is limited to six clinicians per cohort. To confirm your place in the May 30-31, 2026 session, a deposit is required. You may also express interest in Fall 2026 cohorts.
